### TESTS PERFORMED AND RESULTS:

The 96 hour static fish bioassay was performed in accordance with Washington State Department of Ecology methods, with results attached.

#### 96 HOUR STATIC FISH BIOASSAY

##### Description of Test Set Up

The test was performed in triplicate at each concentration in 10 gallon glass aquaria (8" x 10" x 14") containing 30 liters of water. The water used in the test was tap water with a hardness of about 110 mg/L. Light was provided with fluorescent lamps for 18 hours per day. All test and control aquaria contained 10 organisms. All tanks were aerated during the first 24 hours of the test period; no further aeration was made during the 96 hour test period. The test was started on 08/14/89. The waste was added to the tanks directly.
